

AUTO, TRUCK AND SUV
Performance Rotors from Brake Performance for less than plain rotors with free brake pads. Available for all auto, truck and SUVs from 1937 to 2009. Brake Performance Brake Rotors are available in 3-styles: -Slotted & Cross Drilled, -Slotted & Dimpled Drilled -Performance Slotted. Our Performance Rotors feature full sweep scraper slots that extend off the outer diameter of the Rotor which produces, superior stopping, deglazing of brake pads, dispersing dust away from wheels, and better braking in wet weather. All of our Performance Rotors are Zinc Plated in Black or Silver for great looks and protection against rusting. Zinc plating remains in Slots and Holes even after break-in.

COST-CONSCIOUS
Continental Tire North America, Inc. is now offering cost-conscious trucking companies its first solution for both weight and fuel savings, with the introduction of the HTL1® wide-base trailer tire. Designed for significant weight savings and fuel efficiency, the HTL1® (Heavy Trailer Long-Haul) is a super single tire that replaces duals on highway or regional trailer axle fitments.

The HTL1® features 13/32" tread depth, which minimizes irregular wear and maximizes fuel efficiency. The six rib design evenly distributes the load over the crown of the tire to protect the tread pattern from irregular wear, and a decoupler rib provides better irregular wear resistance at the shoulder.

FAST CHARGER

The new PowerRush™ Platinum AGM battery from Carrier Transicold provides higher performance and significantly longer life than conventional 12-volt wet-cell batteries. Available through Carrier

Transicold dealers, the maintenance-free PowerRush Platinum battery delivers high power when and where you need it most. Absorbed glass mat (AGM) technology provides 1150 CCA (Cold

Cranking Amps) of high starting power, deep cycling ability and exceptional cold starting performance. At -40F (-20oC), the pure lead PowerRush Platinum AGM retains 75 percent more power than typical Group 31 wet cell batteries. The battery's fast charge acceptance reduces engine run time for recharging, potentially reducing fuel consumption when Carrier refrigeration units are used in "Start-Stop" mode.

ENHANCED SENSING

Mobile Awareness, LLC announced the SE (Sensor Enhancement) version of their SenseStat™ Obstacle Detection Sensor System family. SenseStat™ is an innovative Obstacle Detection Sensor System that simultaneously monitors 4-zones at the rear of a vehicle indicating the area closest to an object. It is extremely accurate (within one inch), highly affordable and intended for use on Commercial, Off-Road, Lift Truck and Construction Vehicles. The SenseStat™ SE version is a new design improvement which maximizes protection of the sensors, while providing greater mounting flexibility and reliability. These features found on the SE version are further enhanced by a full 3 year limited warranty.

LOOK SHARP

Hendrickson Bumper and Trim unveils its AERO CLAD® bumper with stylish air dam for 2003 and newer Volvo VNL on-highway trucks. This AERO CLAD VNL bumper comes as part of an optional factory-installed metal bumper package on VNL trucks and also is available for retrofits exclusively through Volvo and Mack dealers. With its brilliant polished stainless steel finish, the all new AERO CLAD bumper for the Volvo VNL is resistant against weather and corrosion, making it the perfect choice for truckers who desire high levels of quality and durability. All Hendrickson AERO CLAD bumpers come standard with a 5-year limited warranty against corrosion.

CHANGING DOWNTIME INTO ROAD TIME

ESOC SERIES 450 Fuel Recycling Machine

- Recycles fuel from any fuel filter
- Reduced vehicle down time
- Recycling of diesel fuel
- Pre-charges fuel system
- Manual water separation discharge

ESOC family of products working together with "Spill-Free" fittings

Move At The Speed of ESOC.
Our mission is to develop GREEN diesel engine fluid exchange technologies for preventative maintenance of trucks that are fast, to minimize truck down time, and convenient for the operator to perform.

QUICK-CONNECT
AirSept's new TransGuard transmission filters protect replacement transmissions from the harmful debris that flushing misses. TransGuard installs at the oil cooler outlet without cutting lines. A magnet traps ferrous material, and a built-in bypass allows flow even if the filter is full. TransGuard comes in standard sizes, with quick connect, threaded, and barb style connectors.
